New York, NY

Director

Background

Giulio Amodeo is a director at Elysium Digital, specializing in intellectual property litigation.

Giulio has worked on patent and trade secret cases involving a wide variety of technology, ranging from 3D modeling to medical devices, and has submitted an expert witness declaration. He is proficient with the most-used programming languages, such as C/C++, Java, and Python, and has experience with many more. His technical expertise includes multimedia streaming, networking, operating systems, data analysis, machine learning, and finance, and he has conducted review on code bases comprising many millions of lines.

Giulio has an S.M. from Harvard University, as well as a B.S. with highest honors from Sapienza University of Rome, both in computer science. He also has a M.S. in economics from LUISS University. As an undergraduate, Giulio focused on the development of new methods and tools to profile the performance of computational software, while as a graduate student he turned his efforts to studying information diffusion in social networks. Giulio's research in economics explored the advantages of synthesizing stock index funds with derivatives, such as futures contracts.

Prior to joining Elysium Digital, Giulio was a member of a research team at the Harvard School of Public Health. During his time with the group, Giulio took on the development of a complex software modeling the dynamics of HIV epidemics, and his efforts resulted in a five-fold improvement of the model's performance. In his previous life as an economics graduate student, Giulio worked with several startups in his native Italy.
